Copper coat meets its match.
4MAX takes the punches and blows.

4MAX is an alternative to copper coating as a lubricant on stainless steel cold heading wire.

4MAX coating is a complex metal-oxide compound applied to stainless steel wire to specifically aid in lubrication, improve tool life, and reduce machine downtime due to clogging and cleaning.

Customers report that 4MAX stainless steel performed as well as copper coated stainless, but unlike copper, environmentally friendly 4MAX is easier and less expensive to remove.
